This special edition of the President’s Monthly Highlights acknowledges the top-cited journal publications associated with members of the University of Oklahoma, Norman Campus community. Highly cited journal publications are an important aspect of OU’s reputation. Publications in this edition were extracted from the Web of Science database for all years, in each of the three indices: Science Citation Index Expanded, Social Science Citation Index, and Arts & Humanities Citation Index. After each article, the author(s) from OU, their department affiliations, and number of citations are listed. Some authors are no longer with OU, just as any current members of OU who published under another affiliation are not included in these lists. The VPR Office is proud to present these achievements and we hope for the continued success of the faculty, staff, researchers, and students at OU.
